

### **Photos and Videos on LinkedIn, etc.**

**25.** There are online platforms used in the business world, such as LinkedIn, through which one can easily, with one click, send photos and videos to many others. (One should not derive from this paragraph any leniency to use these platforms in the first place. A *rav* must be consulted regarding these matters. We are only attempting to relate the situation as it applies today.) These platforms easily enable a photo or video of a woman to be sent to male contacts, which could constitute a pitfall for them. This is especially an issue if the photo or video includes women who are dressed inappropriately. Therefore, one must be vigilant to ensure that such material is not sent around via these platforms.

(It is important to note that it is forbidden for a man to look at a photo of a *chassan* and *kallah* who are not his immediate relatives. One who sends around such a photo is causing the public to sin.)
