

Where There are Many Women

7. When one is in a place where many women are gathered – and it is almost inevitable that he would walk behind one of them – he should try rush in front of them or toward their side. (*Chut Shani E.H. 21:8; Shevet Halevi 11:285:7*)

8. Similarly, when one is walking down the street or another area where women are present, he should rather look downward while walking than look up to see whether a woman is in front of him – even when there is chance that he will inadvertently find himself walking behind a woman. (*Shevet Halevi 11:285:7*)
